

EXPO Hall Navigation Guide

Be sure to navigate your way through the EXPO Hall during the Statewide Early Psychosis Virtual Conference to secure information and resources.

This guide is designed for your convenience in locating services and resources of interest. Take a few moments ahead of the event to review the vendors being showcased. Feel free to visit all of them or prioritize and visit the ones of most interest to you and your agency.

There are basically three styles of booths vendors will be using to showcase their organizations:

1. **MAKE YOUR PRESENCE KNOWN BOOTH STYLE** | this booth style provides recognition of an agency being a key provider or supporter of early psychosis and clinically high risk psychosis programs. When attendees drop by these booths, they will immediately see the organization's logo and URL/web address.

Some organizations have elected to provide links to PDFs that can be clicked and viewed onsite or, if you prefer, can be saved to your electronic devices or sent directly to your printer.

As these booths will not have anyone with whom you can directly interact, you will have an opportunity in the chat box to leave a message that you dropped by, would like to speak further with them, you appreciate them, or any other question or comment. Agencies will be provided with data and messaging compiled from their respective booths post-event.

2. **INTERACT WITH ATTENDEES BOOTH STYLE** | This booth style provides recognition of an agency being a key provider or supporter of early psychosis and clinically high risk psychosis programs, and, provides an interactive dialog with an attendee drops by this style booth, they will click a button and immediately join a representative in a 'Zoom style' connection within the HopIn platform – no bouncing in and out of the conference.

To fully participate in this interactive dialog, please plan to log into the conference using a Google Chrome internet browser as it is the most compatible with HopIn's platform. Internet Explorer is the least compatible and will not create a successful interactive opportunity.

These booths are designed to have a representative available but there may be periods of time when a representative must step away. Please plan to check back later during those times or take advantage of the

opportunity in the chat box to leave a message that you dropped by, would like to speak further with them, you appreciate them, or any other question or comment. Agencies will be provided with data and messaging compiled from their respective booths post-event.

3. **VIDEO PRESENTATION BOOTH STYLE** | This booth style provides recognition of an agency being a key provider or supporter of early psychosis and clinically high risk psychosis programs with a video reflecting the incredible services provided by organizations. When attendees drop by these booths, an attendee will click the 'play' button and immediately be able to view the video provided.

Some organizations have elected to provide links to PDFs that can be clicked and viewed onsite or, if you prefer, can be saved to your electronic devices or sent directly to your printer.

As these booths will not have anyone with whom you can directly interact, you will have an opportunity in the chat box to leave a message that you dropped by, would like to speak further with them, you appreciate them, or any other question or comment. Agencies will be provided with data and messaging compiled from their respective booths post-event.

Self-Care Resources

The conference planning committee recognizes the importance of self-care and has secured a few resources for your enjoyment during the event. Website URLs are provided for future referencing these resources.
